

STANDARD

MUSCLEMAN

Simple in design – powerful in operation. The Muscleman is a well-proven digging revolution. Light enough to self-trailer behind the smallest of towing vehicles, it takes only minutes to assemble into the operating position.

Operator comfort and safety are ensured with well placed control levers and excellent visibility. The wide anchor points and low centre of gravity provide optimum stability.

Designed to operate in tight corners, the Muscleman will fit through a standard doorway. Yet it packs a powerful 1.9 tonne tear-out force and digs over 7 feet deep! The load-over height is perfect for small dumpers, Skip-Truks, pick-ups, etc., as illustrated here.

A 'HOLE REVOLUTION IN DIGGING!
